VINEYARD

Fruit sourced from our 41 year old 12 hectare Dry Grown Vineyard. Our old vines are not irrigated; something quite unusual in these days of mass commercial production. We prefer low-yielding wine crops with small berries. Although it limits our volume, having smaller fruit fosters an intensity of the flavour, with most of the colour and tannin of the grape being concentrated in or near the skin. The characteristically cool climate of the district ensures slow ripening of the grapes, which also allows for the development of rich flavour and quality grape juice. Grown on ancient gravelly loams in Mount Barker, in the Great Southern region of Western Australia, an area renowned for excellence in cool climate viticulture. Our old vines are all cane pruned and yield 2 tonne per hectare with small bunch weights which add intensity of character and flavour. Galafrey harvest their

grapes from mid March to late April depending on the season.

VINTAGE COMMENTS

This year we started on 16th Feb picking our chardonnay, our earliest since 2007. Volumes were down again due to dry conditions and this year vintage conditions look like last year. High temperatures leading into vintage brought on an early season however over the past 10 years you can see summer and winter rains being normal but spring and autumn rains significantly lower. A solid vintage 2020 is like last year low volumes, good quality and we are in desperate need of good winter rains.

WINEMAKING

The dry, cool climate of Mount Barker is famous for their Rieslings . The Galafrey 2019 Riesling is yet again a stellar performer, and is a reflection of this unique region. Exhibiting chalk, mineral, lime and passion fruit, this much maligned variety is a stand out, serious wine. We endeavour through meticulous viticulture and wine production sympathetic to the vintage conditions to produce a wine that will express varietal characters in tune with its sense of place Winemaking is geared toward producing a wine that is well balanced, lively, well structured, has great cellaring potential and most importantly drinkable.
